Excel PivotTable Basics

Project Overview

This beginner Excel project uses PivotTables to summarize and analyze sales data by category, region, and month.

Dataset Fields

Field	Description
OrderID	Unique order identifier
Date	Order date
Category	Product category
Region	Sales region
Product	Product name
Quantity	Units sold
Sales	Sales amount

Analysis Performed

1. Sales by Category — compares sales totals across product categories.
2. Sales by Region — compares sales totals across regions.
3. Sales by Month — summarizes sales by month.

Key Findings

Based on the provided sample data, total sales are 371,250. Technology is the highest-sales category, the South is the highest-sales region, and March is the highest-sales month. Verify these figures against the final PivotTable Grand Totals before submission.

Skills Practiced

• Organizing tabular data
• Creating Excel PivotTables
• Summarizing sales with Sum of Sales
• Grouping dates by month
• Writing concise business insights
